

## **Dr. Paul Christiansen**

Department of Psychological Sciences  
University of Liverpool  
Liverpool, UK

Dr. Paul Christiansen is a lecturer at the University of Liverpool. His broad research interests focus on automatic and controlled cognitive processes in addiction. He specialises in researching automatic, controlled, and social processes that underlie appetitive decision making. He is particularly interested in unconscious processes that drive unhealthy eating and heavy drinking. He also works in Forensic Psychology, analysing the impact of interrogation techniques on interview yield. He has recently started tweeting about his work and other work in addiction (and beyond)

In addition to research, Dr. Christiansen leads statistics teaching in to psychology students at the University of Liverpool. He was awarded the University of Liverpool Lecturer of the year for 2016, and is currently developing a statistics website with innovative teaching guides.
